

brainwahve® Qualifying Solutions

An innovative blind hiring solution for hiring managers

Brainwahve Qualifying Solutions (BQS) is disrupting the biased hiring process for screening and selecting talent. Brainwahve Qualifying Solutions (BQS) is a unique qualifying hiring process, which enables objectivity in recruiting based on applicant skills and verified experience. BQS provides companies with true blind auditions to increase diversity and decrease turnover.

BQS removes the subjectivity in the hiring process and supports you and your company in finding the right people, for the right job, at the right time and, most importantly, with the right skills, behaviors, and competencies for the roles your team is working to recruit. BQS works with you to identify the skills, behavioral patterns and leadership attributes you need, and the BQS platform, which is objective and independent, identifies the right talent from the candidates who apply for any position at your company.

The software platform BQS provides

- A candidate application and qualification process with granular skill set tables, quality-controlled resume creation, skills assessments, interviewing and reference checking.
- A comprehensive position description process with granular skills tables, job functions and requirements, and corporate culture to ensure we qualify and match the right applicants.
- Seamless integration with most CRM and recruiting software applications.
